PHOTOS OF STAND

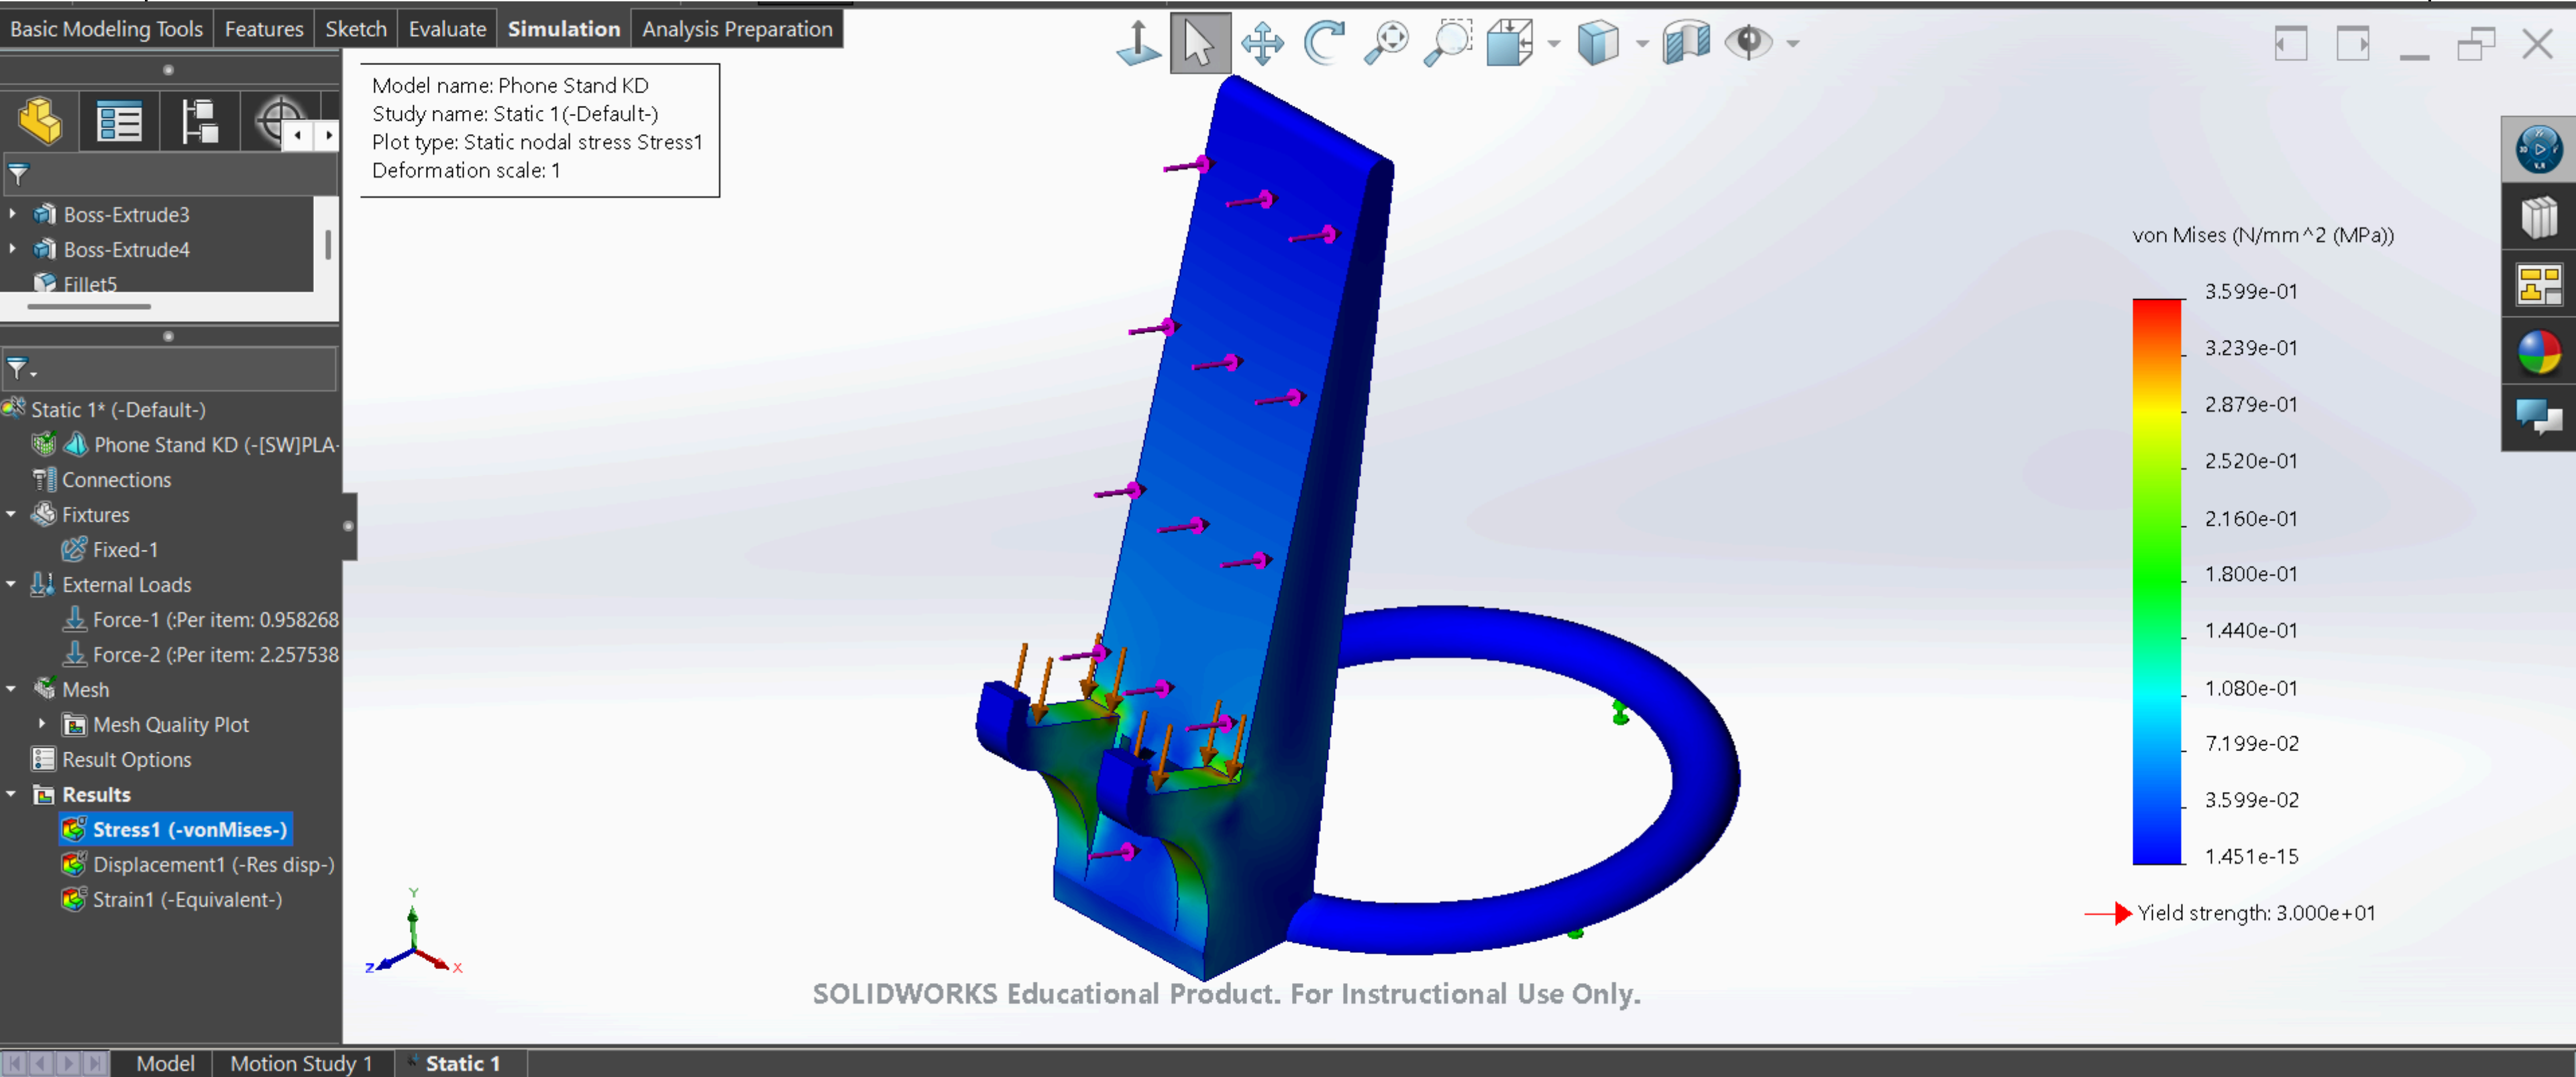

HORIZONTAL AND VERTICAL PHOTOS

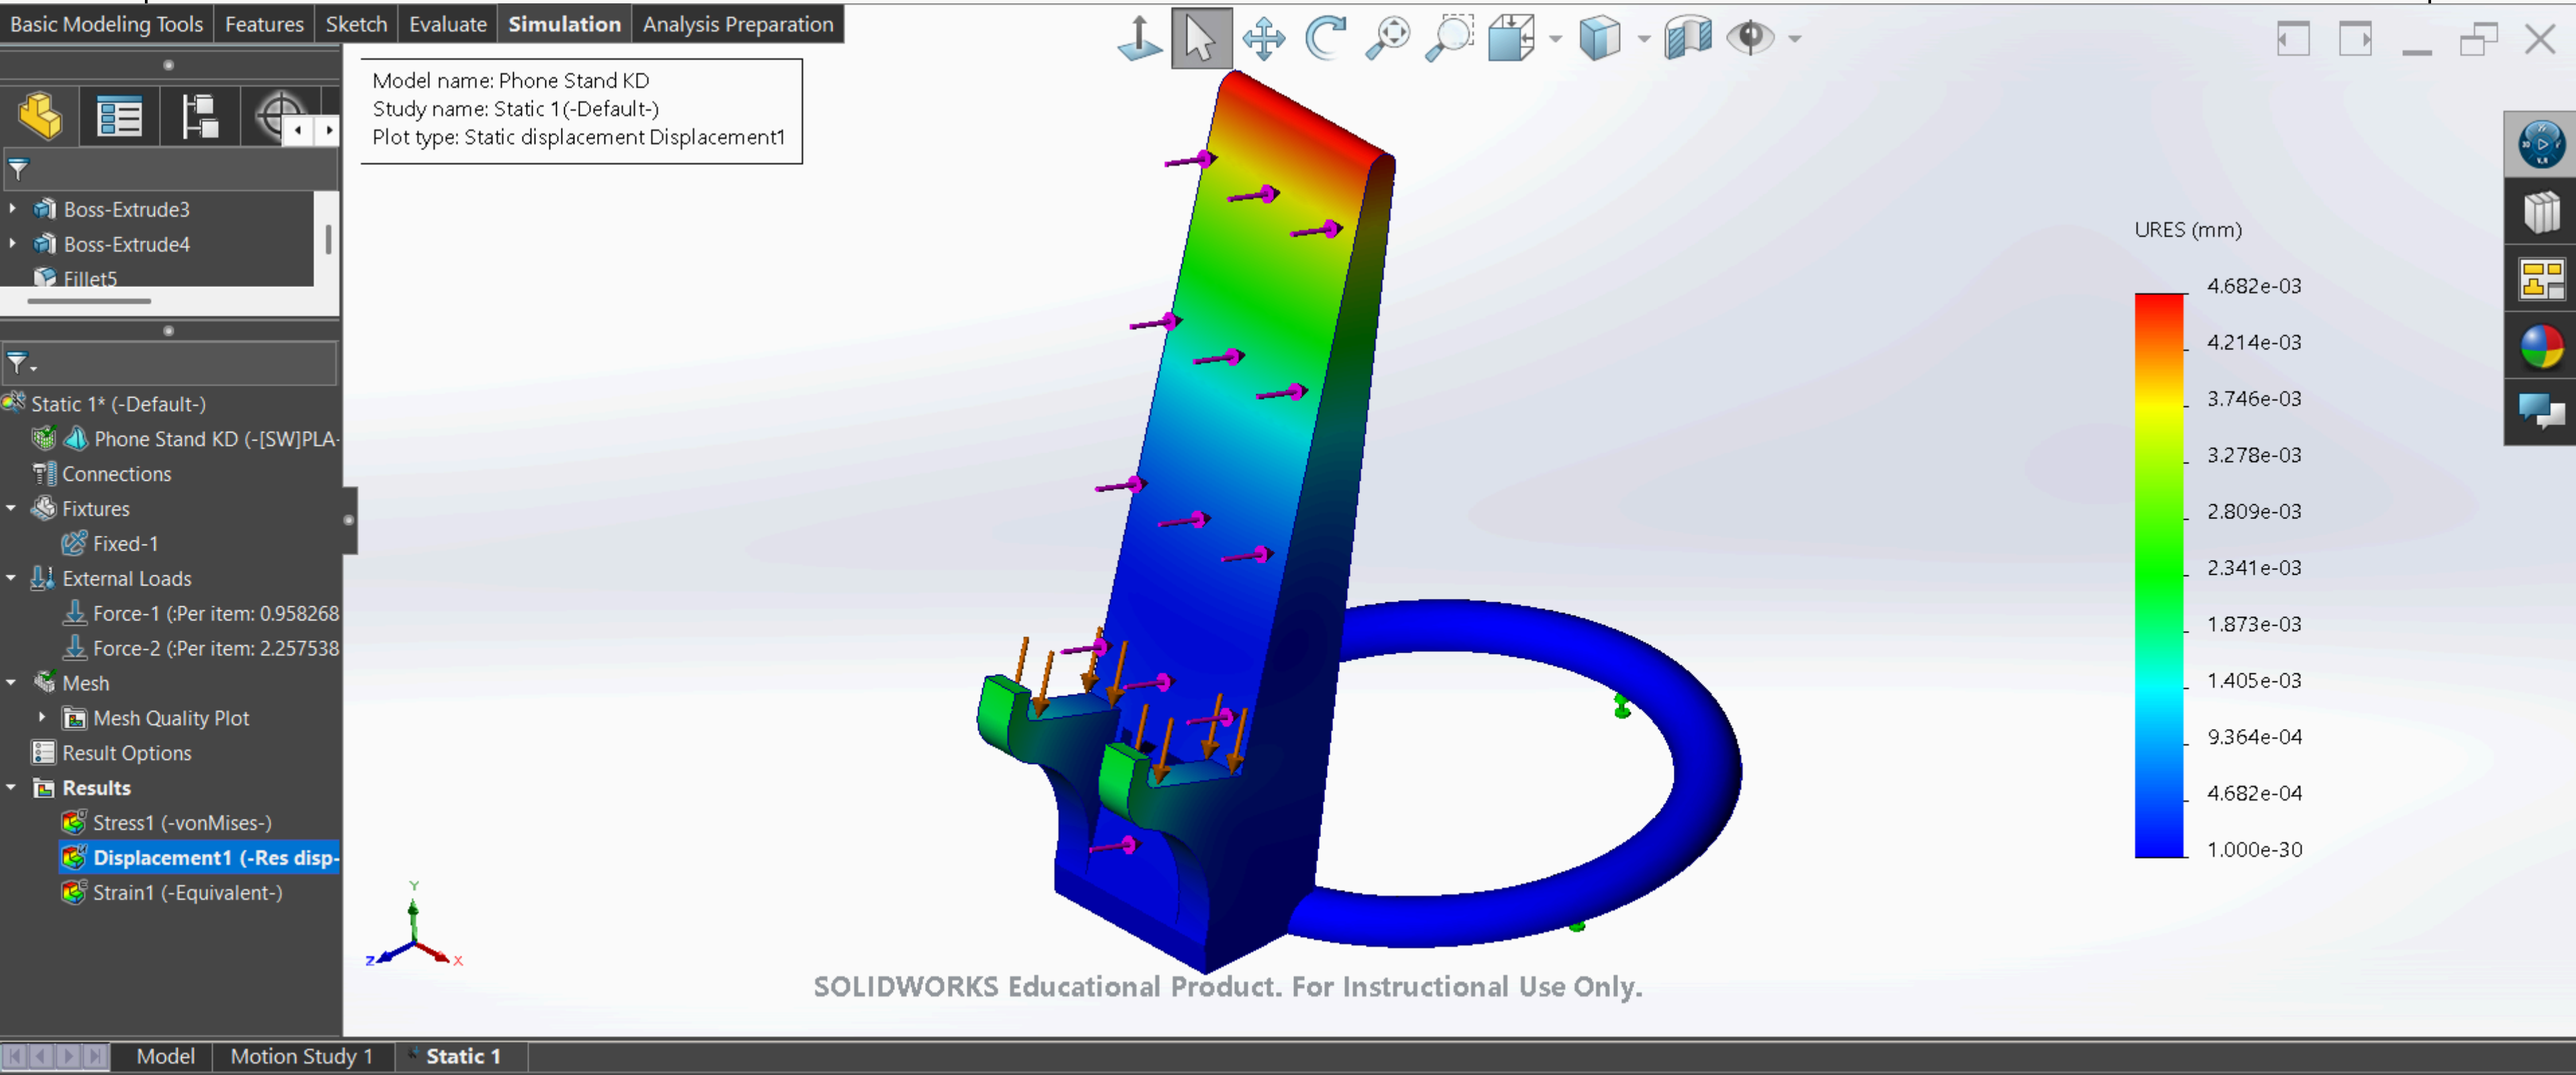

STRESS ANALYSIS

**THE MAX VON MISES STRESS ON THE PHONE STAND IS 0.3599 MPa,
THE YIELD STRENGTH IS 30 MPa, SO THE STAND DOES NOT FAIL.**

DISPLACEMENT ANALYSIS

THE MAXIMUM DEFLECTION OF THE PHONE STAND IS 0.004682MM

REFLECTION

IT WAS CHALLENGING TO DEVELOP A STAND THAT DID NOT TIP. I WENT THROUGH THREE ITERATIONS, ONE INCREASING THE ANGLE FROM THE HORIZONTAL, ANOTHER STRENGTHENING THE BASE. I WOULD RECOMMEND HAVING A LARGE BASE FOR ANY STAND. THE STAND NOW BEHAVES AS EXPECTED.
